MILLIE-MOVA

MOVE A SEATED PERSON FORWARDS AND BACKWARDS SAFELY
AND EASILY ON YOUR EXISTING DINING CHAIRS

The millie-mova is a simple lever and wheels device that safely solves a manual handling and safety problem inherent with the care of many disabled people (of any age). MANY CANNOT PULL THEMSELVES UP TO TABLE ON A NORMAL DINING CHAIR for meals and other activities. It fits most dining chairs and allows a carer to move the seated person forwards or backwards very easily, yet it does not compromise the chair's stability when not in use.

Eliminates risk of injury to Staff

Safeguards services user's legs and hands

Prolongs chair life

Fits most chairs

Improves chair stability

Easily installed
